

**Table IV.** *Conservation of  $\beta$ -bulge type and localization of superimposed  $\beta$ -bulges.* The frequencies of  $\beta$ -bulge superimpositions corresponding to the case of conservation of  $\beta$ -bulge type and conservation of  $\beta$ -sheet localization (in, out and in&out), are given.

( % )	Different $\beta$ -sheet localisation	Same $\beta$ -sheet localisation	sum
Superimposition of different type $\beta$ -bulges	4,97	4,01	8,98
Superimposition of same type $\beta$ -bulges	5,62	27,40	33,03
Sum	10,59	31,41	42,00
No superimposition	---	---	58,00
