

Supplemental Table 1

Correlation between dyslipidemia or statin therapy and tumor control in a cohort of 26 ACC patients under mitotane

Characteristics	Total N (%)	Tumor Control	Progressive disease	<i>P</i>
Dyslipidemia	16 (61.5)	7	9	1
Statin therapy	11 (42.3)	8	3	0.045*

Tumor control is defined as partial response or stable disease according to RECIST criteria. Progressive disease is defined according to RECIST criteria.

* $P < 0.05$, Fisher exact test.
