SGLT-2 inhibitors and GLP-1 receptor agonists for nephroprotection and cardioprotection in patients with diabetes mellitus and chronic kidney disease. A consensus statement by the EURECA-m and the DIABESITY working groups of the ERA-EDTA, *Nephrology Dialysis Transplantation* 2019; gfy407. doi: 10.1093/ndt/gfy407

In the original article, the words 'micro- or microalbuminuria' should have read 'micro- or macroalbuminuria' in the top boxes of Figures 4 and 5.
